TABLE OF CONTENTS:	
Chapter 01: Concepts and Trends in Healthcare	1
Chapter 02: Settings and Models for Nursing Care	18
Chapter 03: The Nursing Process, NCLEX-Style	34
Chapter 04: Interviewing and Physical Assessment	48
Chapter 05: Legal and Ethical Issues	62
Chapter 06: Leadership Roles and Management Functions	78
Chapter 07: Nurse-Client Relationships	91
Chapter 08: Cultural Care Considerations	106
Chapter 09: Integrative Medicine and Alternative Therapies	117
Chapter 10: End-of-Life Care	129
Chapter 11: Pain Management	142
Chapter 12: Infection	157
Chapter 13: Intravenous Therapy	173
Chapter 14: Perioperative Care	186
Chapter 15: Disaster Situations	201
Chapter 16: Caring for Clients With Fluid, Electrolyte, and Acid-Base Imbalances	214
Chapter 17: Caring for Clients in Shock	228
Chapter 18: Caring for Clients With Cancer	242
Chapter 19: Introduction to the Respiratory System	260
Chapter 20: Caring for Clients With Upper Respiratory Disorders	276
Chapter 21: Caring for Clients With Lower Respiratory Disorders	291
Chapter 22: Introduction to the Cardiovascular System	304
Chapter 23: Caring for Clients With Infectious and Inflammatory Disorders of the Heart and Blood Vessels	316
Chapter 24: Caring for Clients With Valvular Disorders of the Heart	328
Chapter 25: Caring for Clients With Disorders of Coronary and Peripheral Blood Vessels	341
Chapter 26: Caring for Clients With Cardiac Arrhythmias	354
Chapter 27: Caring for Clients With Hypertension	367
Chapter 28: Caring for Clients With Heart Failure	380
Chapter 29: Caring for Clients Undergoing Cardiovascular Surgery	394
Chapter 30: Introduction to the Hematopoietic and Lymphatic Systems	410
Chapter 31: Caring for Clients With Disorders of the Hematopoietic System	423
Chapter 32: Caring for Clients With Disorders of the Lymphatic System	439
Chapter 33: Introduction to the Immune System	455
Chapter 34: Caring for Clients With Immune-Mediated Disorders	471
Chapter 35: Caring for Clients With HIV/ AIDS	487
Chapter 36: Introduction to the Nervous System	504
Chapter 37: Caring for Clients With Central and Peripheral Nervous System Disorders	518
Chapter 38: Caring for Clients With Cerebrovascular Disorders	532
Chapter 39: Caring for Clients With Head and Spinal Cord Trauma	546
Chapter 40: Caring for Clients With Neurologic Deficits	561
Chapter 41: Introduction to the Sensory System	576
Chapter 42: Caring for Clients With Eye Disorders	588
Chapter 43: Caring for Clients With Ear Disorders	599

## Introductory Medical-Surgical Nursing 12th Edition By Timby Smith Test Bank

Chapter 44: Introduction to the Gastrointestinal System and Accessory Structures	613
Chapter 45: Caring for Clients With Disorders of the Upper Gastrointestinal Tract	626
Chapter 46: Caring for Clients With Disorders of the Lower Gastrointestinal Tract	641
Chapter 47: Caring for Clients With Disorders of the Liver, Gallbladder, or Pancreas	655
Chapter 48: Caring for Clients With Ostomies	667
Chapter 49: Introduction to the Endocrine System	682
Chapter 50: Caring for Clients With Disorders of the Endocrine System	694
Chapter 51: Caring for Clients With Diabetes Mellitus	708
Chapter 52: Introduction to the Female and Male Reproductive Systems	722
Chapter 53: Caring for Clients With Disorders of the Female Reproductive System	735
Chapter 54: Caring for Clients With Breast Disorders	748
Chapter 55: Caring for Clients With Disorders of the Male Reproductive System	763
Chapter 56: Caring for Clients With Sexually Transmitted Infections	777
Chapter 57: Introduction to the Urinary System	792
Chapter 58: Caring for Clients With Disorders of the Kidneys and Ureters	805
Chapter 59: Caring for Clients With Disorders of the Bladder and Urethra	819
Chapter 60: Introduction to the Musculoskeletal System	833
Chapter 61: Caring for Clients Requiring Orthopedic Treatment	846
Chapter 62: Caring for Clients With Traumatic Musculoskeletal Injuries	861
Chapter 63: Caring for Clients With Orthopedic and Connective Tissue Disorders	876
Chapter 64: Introduction to the Integumentary System	889
Chapter 65: Caring for Clients With Skin, Hair, and Nail Disorders	903
Chapter 66: Caring for Clients With Burns	916
Chapter 67: Interaction of Body and Mind	930
Chapter 68: Caring for Clients With Anxiety Disorders	942
Chapter 69: Caring for Clients With Mood Disorders	956
Chapter 70: Caring for Clients With Eating Disorders	970
Chapter 71: Caring for Clients With Chemical Dependence	981
Chapter 72: Caring for Clients With Dementia and Thought Disorders	997

## Chapter 01: Concepts and Trends in Healthcare

### Introductory Medical-Surgical Nursing 12th Edition by Timby Smith Test Bank

---

1. Managed care organizations are insurers that carefully plan and closely supervise the distribution of healthcare services. What is one of the goals of managed care?
- A) Preventing illness through screening and promotion of health activities
  - B) Improving training of healthcare professionals
  - C) Eliminating health disparities between segments of the population
  - D) Providing hospice or home hospice care

Ans: A

**Feedback:**

Preventing illness through screening and promotion of health activities is one of the goals of managed care. Improved training of healthcare professionals is the priority for international health and not the goal of managed care. Eliminating health disparities between the segments of population is a goal of Healthy People 2020. Providing hospice or home hospice care is only for terminally ill clients.

2. In an effort to cut costs, hospitals have instituted many changes. Which of these cost-cutting factors is most likely to jeopardize the quality of care?
- A) Using unlicensed assistive personnel
  - B) Increasing numbers of clients in hospitals
  - C) Not devoting enough time to the client
  - D) The rise of medical care costs in healthcare systems

Ans: A

**Feedback:**

Hospitals are using unlicensed assistive personnel to perform some duties practical and registered nurses once provided. Many are concerned that the use of unlicensed assistive personnel will jeopardize the quality of care. Increasing numbers of clients in hospitals, not devoting enough time to the client, or the rise of medical costs are less likely to jeopardize the quality of care.

3. Since losing his right leg years ago, Mr. Smith and his wife have formed a community walking group to raise money for the homeless in his area. Which of the following has contributed to him being viewed as “healthy”?
- A) The client is married and is moving on.
  - B) The client is experiencing high quality of life within the limits of the physical condition.
  - C) The client is facing various states of health and illness.
  - D) The client is physiologically and psychologically stable.

Ans: B

**Feedback:**

Clients adapt physically, emotionally, and socially, enabling them to maintain comfort, stability, and self-expression. Clients with chronic illness can achieve a high level of wellness and experience high quality of life. Marriage is an aspect of quality of life but does not define the quality of the client's life. All clients experience various states of health and illness.

4. A 17-year-old client is having protected sex one to two times a week in a monogamous relationship. What is the client participating in?

A) Health promotion  
B) Health maintenance  
C) Illness prevention  
**D) Wellness**

Ans: B

**Feedback:**

Protecting one's current level of health by practicing safe sex to prevent illness is an example of a health maintenance activity. Health promotion strategies are used to enhance health, such as eating a diet high in fiber. Illness prevention includes identifying risk factors such as hypertension. Wellness is the balance of total well-being.

5. A client complaining of bloody urine has scheduled an appointment with a family practitioner. What type of care is the client receiving?

A) Tertiary  
B) Secondary  
C) Skilled nursing care  
**D) Primary**

Ans: D

**Feedback:**

The first provider that clients contact about a health need provides primary care; this person is typically a family practitioner or nurse practitioner. Secondary care includes referrals to facilities for additional testing. Tertiary care focuses on more complex medical and surgical intervention. Skilled nursing care occurs in facilities or units that offer prolonged health maintenance or rehabilitative services.

6. The hospital is having a problem with healthcare-associated infections. A committee has been established to study the problem and make recommendations. The nurse working on the committee knows that this work addresses what?

A) Inpatient quality indicators  
B) Prevention quality indicators  
C) National Patient Safety Goals  
D) Patient safety indicators

Ans: C

**Feedback:**

The Joint Commission has established National Patient Safety Goals that are updated annually. These safety goals have changed how patients are identified and prevent adverse effects. Some of the 2012 goals include reducing the risk of healthcare-associated infections. Patient safety indicators reflect the quality of care in hospitals but focus on potentially avoidable complications. Prevention indicators identify hospital admissions that could be avoided through high-quality outpatient care. Inpatient indicators reflect quality of care inside the hospital.

7. After hip surgery, a client is admitted to the rehabilitation hospital. What type of care is the client receiving?

A) Secondary  
B) Tertiary  
C) Rehabilitation  
D) Primary

Ans: B

**Feedback:**

Hospitals where specialized technology is available provide tertiary care. Primary care is the initial contact that a client has, such as an appointment with a family practitioner. Secondary care includes referrals for additional testing. Rehabilitation is aimed at restoring a person to his or her fullest ability.

8. An older man has been sick for 3 weeks but will not seek medical help even though he is able to get to the doctor's office. The client does not know what his insurance will cover. The client has many medical bills from treatments not covered and does not want to be faced with more. Why is this client waiting to obtain medical treatment?
- A) Cost
  - B) Language
  - C) Accessibility
  - D) Culture**

Ans: A

**Feedback:**

Many groups, such as ethnic minorities and older adults, are underserved; many do not seek early services because they cannot afford to pay for them. Accessibility is not an issue because the client is able to get to the office. No cultural or language barrier is mentioned.

9. The *Healthy People 2020* initiative targets the improvement of health for all. In addition to eliminating health disparities, what are the broad goals of this plan?
- A) Increasing technological innovations
  - B) Preventing treatable problems
  - C) Applying a systematic approach to health improvement
  - D) Increasing the quality and length of a healthy life**

Ans: D

**Feedback:**

Two broad goals of the *Healthy People 2020* initiative are to increase quality and years of healthy life and eliminate health disparities. *Healthy People 2020* initiatives will help with treatable problems but will not prevent problems. The initiative does not apply a systematic approach to health improvement or increase technological innovations.
