- D. Encourage bottle feeding

Feedback

Ahead: Frameworks of Pediatric Health

Complexity: Moderate

Subject: Chapter 1

Taxonomy: Analysis

Title: Introduction to Children's Health Care

The correct answer is: Encourage breast feeding

Question 3

As a pediatric nurse, what can you infer from an adolescent who has a close relationship with an older family member?

Select one:

- A. The adolescent is at increased risk for poor physical and mental health.
- B. The adolescent is likely to engage in risky behavior.
- C. The adolescent is less likely to engage in risky behavior.**
- D. The adolescent will have a greater chance of becoming obese.

Feedback

Ahead: Frameworks of Pediatric Health

Complexity: Moderate

Subject: Chapter 1

Taxonomy: Analysis

Title: Introduction to Children's Health Care

The correct answer is: The adolescent is less likely to engage in risky behavior.

Question 4

As a pediatric nurse, what can you infer from an adolescent who lives in a distressed neighborhood with high poverty rates?

Select one:

- A. The adolescent is likely to engage in risky behavior.
- B. The adolescent is less likely to engage in risky behavior.
- C. The adolescent is at increased risk for poor physical and mental health.**
- D. The adolescent will have a greater chance of educational achievement.

Feedback

Ahead: Frameworks of Pediatric Health

Complexity: Moderate

Subject: Chapter 1

Taxonomy: Recall

Title: Introduction to Children's Health Care

The correct answer is: The adolescent is at increased risk for poor physical and mental health.

Question 5

As a pediatric nurse, you can assist family members to develop components of the family strengths models. Which of the following actions would be indicative of a nurse promoting components of this model?

Select one:

- A. Educating the family on the child's needs
- B. Encouraging positive communication**
- C. Determining who the primary decision maker of the family is
- D. Ensuring the family knows the child's needs

Feedback

Ahead: Caring for Families

Complexity: Moderate

Subject: Chapter 1

Taxonomy: Application

Title: Introduction to Children's Health Care

The correct answer is: Encouraging positive communication

Question 6

If a child has a chronic illness and the family cares for the child, as a pediatric nurse, what can you assume from this situation?

Select one:

- A. The family is seeking advice on the care of their child.
- B. The family thinks of you as an expert on the care of their child.
- C. The child requires more care than the family is able to provide.
- D. The family knows what the child needs and how to respond to their needs.**

Feedback
