Table of contents:

| |
|--|
| Chapter 1 The nurse's Role in Adult Health Nursing |
| Chapter 2 Health Education and Health Promotion |
| Chapter 3 Chronic Illness and End-of-Life Care |
| Chapter 4 Fluid and Electrolyte and Acid–Base Imbalances |
| Chapter 5 Perioperative Nursing |
| Chapter 6 Cancer Care |
| Chapter 7 Pain Management |
| Chapter 8 Nursing Assessment: Respiratory Function |
| Chapter 9 Nursing Management: Patients with Upper Respiratory Tract Disorders |
| Chapter 10 Nursing Management: Patients with Chest and Lower Respiratory Tract Disorders |
| Chapter 11 Nursing Management of Patients Diagnosed with Chronic Obstructive Pulmonary Disease and Asthma |
| Chapter 12 Nursing Assessment: Cardiovascular and Circulatory Function |
| Chapter 13 Nursing Management: Patients with Hypertension |
| Chapter 14 Nursing Management: Patients with Coronary Vascular Disorders |
| Chapter 15 Nursing Management: Patients with Complications from Heart Disease |
| Chapter 16 Nursing Management: Patients with Structural, Inflammatory and Infectious Cardiac Disorders |
| Chapter 17 Nursing Management: Patients with Arrhythmias and Conduction Problems |
| Chapter 18 Nursing Management: Patients with Vascular Disorders and Problems of Peripheral Circulation |
| Chapter 19 Nursing Assessment: Hematologic Function |
| Chapter 20 Nursing Management: Patients with Hematologic disorders |
| Chapter 21 Nursing Assessment: Digestive, Gastrointestinal, and Metabolic Function |
| Chapter 22 Nursing Management: Patients with Oral and Esophageal Disorders and Patients Receiving Gastrointestinal Intubation, Enteral, and Parenteral Nutrition |
| Chapter 23 Nursing Management: Patients with Gastric and Duodenal Disorders |
| Chapter 24 Nursing Management: Patients with Intestinal and Rectal Disorders |
| Chapter 25 Nursing Management: Patients with Hepatic and Biliary Disorders |
| Chapter 26 Nursing Assessment: Renal and Urinary Tract Function |
| Chapter 27 Nursing Management: Patients with Renal Disorders |
| Chapter 28 Nursing Management: Patients with Urinary Disorders |
| Chapter 29 Nursing Assessment: Endocrine Function |
| Chapter 30 Nursing Management: Diabetes Mellitus |
| Chapter 31 Nursing Management: Patients with Endocrine Disorders |
| Chapter 32 Nursing Assessment: Female and Male Reproductive Function |
| Chapter 33 Nursing Management: Patients with Breast and Female Reproductive Disorders |
| Chapter 34 Nursing Management: Patients with Male Reproductive Disorders |
| Chapter 35 Nursing Management: Patients with Sexually Transmitted Infections |
| Chapter 36 Nursing Assessment: Immune Function |
| Chapter 37 Nursing Management: Patients with Immunodeficiency, HIV Infection, and AIDS |
| Chapter 38 Nursing Management: Patients with Allergic Disorders |

| |
|---|
| Chapter 39 Nursing Management: Patients with Rheumatic Disorders |
| Chapter 40 Nursing Assessment: Musculoskeletal Function |
| Chapter 41 Nursing Management: Patients with Musculoskeletal Disorders |
| Chapter 42 Nursing Management: Patients with Musculoskeletal Trauma |
| Chapter 43 Nursing Assessment: Neurologic Function |
| Chapter 44 Nursing Management: Patients with Oncologic Disorders of the Brain and Spinal Cord |
| Chapter 45 Nursing Management: Patients with Neurologic Trauma |
| Chapter 46 Nursing Management: Patients with Neurologic Disorders |
| Chapter 47 Nursing Management: Patients with Cerebrovascular Disorders |
| Chapter 48 Nursing Assessment: Sensorineural Function |
| Chapter 49 Nursing Management: Patients with Eye and Vision Disorders |
| Chapter 50 Nursing Management: Patients with Hearing and Balance Disorders |
| Chapter 51 Nursing Assessment: Integumentary Function |
| Chapter 52 Nursing Management: Patients with Dermatologic Problems |
| Chapter 53 Nursing Management: Patients with Burn Injury |
| Chapter 54 Nursing Management: Shock and Multisystem Failure |
| Chapter 55 Nursing Management: Critical Care |
| Chapter 56 Nursing Management: Emergencies and Disasters |

Focus on Adult Health Medical Surgical Nursing 2nd Edition Honan Test Bank

Chapter 1 The nurse's Role in Adult Health Nursing

MULTIPLE CHOICE

1. The nurse ensures that a clients bedspace is neat and clean with the call light within easy reach. The nurse is focusing on which nursing theorist who realized the importance of the environment for care?

1. Florence Nightingale
2. Sister Callista Roy
3. Dorothea Orem
4. Martha Rogers

ANS: 1

Florence Nightingales theory focused on the environment for care. Sister Callista Roys model is based in systems theory and an individuals ability to adapt. Dorothea Orem's model is the self-care deficit theory. Martha Rogers model is the science of unitary human beings.

PTS:1DIF:Apply

REF:Emergence of Contemporary Nursing in the United States

2. The nurse is instructing a client on self-administration of insulin so that the client will not need a health care provider to do this activity. The nurse is implementing which of the following aspects of Virginia Hendersons theory of nursing?

1. A caring relationship
2. Helping the client achieve independence from the nurses assistance as quickly as possible
3. Integration of objective and subjective data
4. Application of critical thinking

ANS: 2

Virginia Henderson's theory of nursing is to help people achieve health or a peaceful death so that they can be independent from the nurse's assistance as quickly as possible. A caring relationship, integration of objective and subjective data, and application of critical thinking are included in the American Nurses Association's essential features of professional nursing.

PTS:1 DIF:Analyze

REF:Emergence of Contemporary Nursing in the United States

A. client tells the nurse that he has an HMO for his health insurance. The nurse understands that the purpose of this type of health plan is to:

-
1. ensure payment is made to Medicare for services rendered.

 2. maximize the utilization of health care resources.

 3. efficiently manage costs while providing quality care.

 4. focus on the illness when providing care.

ANS: 3

Health maintenance organizations (HMOs) were created to efficiently manage health care costs while providing quality care. An HMO is a type of managed care plan with the goal of providing wellness care and not focusing on the illness during the provision of care. HMOs do not ensure payment is made to Medicare for services rendered. HMOs also do not maximize the utilization of health care resources but rather use financial incentives to decrease care costs.

PTS: 1 DIF: Understand REF: Cost of Care

4.A client tells the nurse that he does not have a primary care physician but rather makes an appointment with a doctor who specializes in the area in which he is experiencing a problem. The nurse realizes this client is at risk for which of the following?

-
1. Fragmented care

 2. Overpayment of services

 3. Inability to sustain health

 4. Finding an appropriate general practitioner

ANS: 1

In the 1980s, the close and trusting relationship between an individual and the individual's physician waned and was replaced by acquaintances with specialists based upon particular health care problems. These episodes of care cause fragmentation of care. The client who utilizes specialists is not at risk for overpayment of services, the inability to sustain health, or finding an appropriate general practitioner.

PTS:1 DIF:Analyze REF:Providers of Care

5. The nurse is attending a masters degree program in efforts to be educationally prepared to serve as a hospital leader. The nurse realizes that this educational preparation will:

-
1. hinder the nurses ability to work with physicians.

 2. be viewed as not supporting the profession of nursing by other nurses.

 3. ensure the nurse is biased towards clinicians interests.

 4. prepare the nurse to serve as strong clinical support with the ability to integrate business and caring.

ANS: 4

The nurse is attending an educational program to serve as a hospital leader. This education will prepare the nurse to serve as strong clinical support with the ability to integrate business and caring. This education will not hinder the nurses ability to work with physicians. This education will not be viewed as unsupportive to the profession of nursing. The education will ensure that the nurse is not biased towards clinicians interests.

PTS: 1 DIF: Analyze REF: Clinical Systems Leadership

6. A client tells the nurse that all hospitals care about is doing the minimum for a client regardless of the outcome. Which of the following should the nurse respond to this client?

-
1. It does feel like that sometimes.

 2. Health insurance companies have caused this problem.

 3. The doctors will get paid regardless of the clients outcomes.

-
4. There are quality programs in place to make sure clients receive the best quality of care regardless of the cost.

ANS: 4

In response to concerns about safety and quality of care voiced by clients and providers, total quality management and continuous quality improvement programs were initiated. These programs ensure society that cost management is not compromising safety or quality. This is what the nurse should respond to the client. The other choices do not address the clients concerns nor do they explain quality management programs.

PTS: 1 DIF: Apply REF: Quality Measure Shift

7. The nurse is providing care at a time that is the most beneficial to the client. The nurse is implementing which of the following Joint Commission Dimensions of Quality Performance?

-
- | | |
|----|--------------|
| 1. | Safety |
| 2. | Timeliness |
| 3. | Efficiency |
| 4. | Availability |
-

ANS: 2

The dimension of timeliness means the degree in which interventions are provided at the most beneficial time to the client. Safety means the degree in which the risk of an intervention and risk to the environment are reduced for both client and health care provider. Efficiency means the degree in which care has the desired effect with a minimum of effort, waste, or expense. Availability means the degree in which appropriate interventions are available to meet the clients needs.

PTS:1DIF:Analyze

REF:Box 1-1 Joint Commission Dimensions of Quality Performance

8. The nurse is providing care while adhering to safety as a Joint Commission Dimension of Quality Performance. Which of the following did the nurse provide to the client?

-
1. Using a needleless device when providing intravenous medications
